

4/24/09 Webinar: Getting the most value from Dynamics SL

Download the Webinar Recording: April 24 - Getting the Most Value from Dynamics SL

If you are like the rest of us, you would like to get more value out of your implementation of Dynamics SL. But who has time to slow down long enough to learn how?!

This meeting of the Dynamics SL User Group will focus on identifying and developing topics for our enhanced programming this year in addition to the annual conference.

Please help by joining us on Friday, April 24 at 11:30am Eastern, 8:30am Pacific, for a Focus Group session on the topics you want the user group to address over the next few months and at the upcoming Dynamics SL User Group Conference in San Diego (September 16-18).

At this session, we will present a list of topics that have already been nominated by users, or developed by the executive board. Each topic will have some detail about what the session is intended to cover and who it is aimed at. We need your input about what would make these sessions more interesting/relevant/effective/useful — or whether you want them presented at all. We’re also interested in your nominations for presenters.

We will also take suggestions prior to the session from any focus group participant. Please submit any topic suggestions, along with a few short sentences about what the session should cover, who it’s aimed at, and suggestions on who might present it (if you know) to Gail Jones-Nemeth: gjonesne@betco.com.

Please let us know if you can join us on the webinar by sending an email to David Subry.
